Fund Formation

From the outset, Whitmill Trust is able to provide guidance in determining the most effective structure and co-ordinate its implementation. Prior to the establishment and launch stage, it is imperative that the key elements are synchronised and this is where an experienced service provider can be invaluable, ensuring the expectations of the clients and investors are met and often exceeded. It is important to have clarity from the outset to achieve the fund's launch within expected timeframes, as failure to do so can impact both on the profitability of the manager's operations and more importantly, on the confidence of investors. Our team provides pro-active guidance with a "can do" approach to assist with the following matters:

- Establishing offshore and on-shore funds and fund management companies, assisting with fund structuring and liaising with the relevant regulators;
- Arranging and coordinating the drafting of all fund documentation via legal counsel, including placement memorandum, subscription documents, trust instrument, partnership agreement and all other requisite legal documentation as may be required and liaising with all other appointed service providers;
- Effectively communicating with key service providers, such as auditors, prime brokers, bankers and trustees (as applicable); and
- Arranging the set-up and operation of bank and custody accounts.

Once the fund and fund manager's operations are up and running, we offer a highly personalised administration service for the fund.
